Sangamner, Maharashtra

Profile Summary

Master of Computer Applications (MCA) student at MIT World Peace University, Pune, with hands-on exposure to **Java, Spring Boot, MySQL, and REST APIs** through an internship at The BAAP Company. Developed academic projects involving web applications, databases, and embedded systems. Seeking an opportunity to apply software development and problem-solving skills in a professional environment.

Education

MIT World Peace University — Pune, Maharashtra
Master of Computer Applications (MCA) — *2026 – 2028*

Sangamner College, SPPU — Sangamner, Maharashtra
B.Sc. Computer Science, CGPA: 8.83 — *2023 – 2026*

Experience

Intern — Nov 2025 – Dec 2025
The BAAP Company

- Worked with **Java, Spring Boot, MySQL, and HTML/CSS** while learning project workflows and application development
- Built REST APIs, handled database connectivity, and explored backend architecture using **Spring Boot**
- Applied software development practices while learning how real-world applications are built.

Projects

Dairy Production Management System | *HTML, Java, MySQL*

- Developed an HTML, Java & MySQL-based Dairy Production Management System to automate milk collection, inventory, and order processing with secure role-based modules.

Digital Literacy & Cybersecurity Awareness Program

- Organized and conducted digital literacy and Cybersecurity awareness sessions at schools to educate students about basic digital tools and online safety.

E-Nursery E-commerce Website | *PHP, JavaScript, PostgreSQL*

- Developed a **full-stack e-commerce platform** for an e-nursery using PHP, JavaScript, and PostgreSQL.
- Implemented key features including a user-friendly shopping cart, secure user authentication, product search, and order processing.
- Architected and managed the PostgreSQL database to efficiently store and retrieve product and user data.

Arduino-Based Speed Tracker | *Arduino Uno, C/C++*

- Developed a real-time speed monitoring system using Arduino Uno, ultrasonic sensors, and C/C++ for accurate distance-time calculation, integrating LCD and serial communication to demonstrate expertise in embedded systems and sensor interfacing.

Skills

Programming Languages: C, Python, Java, JavaScript, PHP
Frameworks & Web Technologies: Laravel, Spring Boot, HTML, CSS
Databases: SQL, MySQL
Operating Systems: Microsoft Windows, Linux

Certifications

- Cyber Job Simulation by Deloitte
- Data Analytics Job Simulation by Deloitte
- Technology Job Simulation by Deloitte
- Robotics & Automation Mini Challenges – OnWingspan (Hardware & Software, Sensors, Bot Programming, TaskBot, Garbage Moving Robot).

Languages

- English: Advanced
- Hindi: Proficient
- Marathi: Proficient

Strengths

- Thinking
- Problem-Solving
- Communication
- Team Collaboration

Hobbies

- Coding
- Reading News
- Video Games
